
After Effects

After Effects Advanced

Duration: 2 Days

Course Description:

The After Effects Advanced course is an in-depth 2 day course that gets into the real nitty-gritty of After Effects. Students are taught, in great detail, real-world tips and tricks that will greatly enhance workflow and working knowledge of the software. The Advanced course primarily focuses on working with Effects, 3D and Expressions, though other topics are covered, with emphasis placed on using After Effects features in creative, interesting and inspiring ways.

Prerequisites

To qualify for this advanced course, you must have previously attended the After Effects Fundamentals and Intermediate courses, or be entirely comfortable with all the concepts and topics covered in these.

Course Contents:

- 1) Advanced Expressions And Scripting - Expressions controls, looping and controlling time, working with Variables, controlling ranges, using Math functions.
- 2) Advanced 3D - Building 3D models and shapes, animating in 3D environments, compositing multi-pass renders from 3D applications, importing 3D camera data, using 3D channel effects.
- 3) Effects In Depth - Distortion effects (warping, morphing, reshaping etc), using masks to control effects, applying tracking data to effects, particles in depth.
- 4) Compound Effects - Compound blur, displacement mapping.
- 5) Effect Generators - Fractal noise, radio waves, lightning, shatter.
- 6) Effects For Colour Treatment and Correction - Levels, curves, channel mixer, colorama, echo, glow, change to colour.
- 7) Advanced Painting And Rotoscoping. 8) Advanced Keying And Compositing
