
After Effects

After Effects Intermediate

Duration: 2 Days

Course Description:

The After Effects Intermediate course is a 2 day, in-depth training session that covers the more challenging aspects of working in After Effects. The aim of the course is to give trainees the confidence and competence to use the techniques covered in the course in every day work, and to familiarise them with aspects of the software that they may not already be familiar with.

Who should attend:

Those who wish to explore new techniques that will greatly enhance their knowledge of the software.

Prerequisites:

To qualify for this Intermediate course you must have previously attended the Fundamentals course, or have a good working knowledge of After Effects and be comfortable with all of the techniques and concepts covered in the Fundamentals course, the details of which can be found elsewhere on this site.

Course Content:

- 1) Setting Up Custom Preferences
- 2) Animation - Understanding animation rules, understanding Velocity and Influence, using the Speed Graphs.
